Assistant Commissioner for Patents

Dear Sir:

1. The present application is a divisional of the parent application Serial No. 09/695,807, which has been assigned to OsteoScreen, Inc. via an assignment recorded as reel/frame 011512/0908, a copy of which is enclosed herewith (Exhibit A). OsteoScreen, Inc. is a corporation of Texas entitled to small entity status. A declaration of small entity status executed by Gregory R. Mundy in connection with the parent application is also enclosed herewith (Exhibit B).

2. The subject of the patent application is a major asset of OsteoScreen, Inc.

3. The development of the technology set forth in the application, which is critical to OsteoScreen, Inc. and which is of significance to biotechnology, will be significantly impaired if examination of the patent application is delayed.

4. The petition fee under 37 C.F.R. 1.17(i) is enclosed.

Explanation (MPEP 708.03, XII, c) of the basis for statement 3:

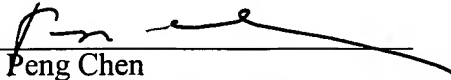

The present application relates to a technology which has the potential for significantly advancing the treatment of hair loss associated diseases or disorders. Hair loss associated diseases or disorders, *e.g.*, male pattern baldness, alopecia caused by chemotherapy, hair thinning due to aging, and genetic disorders, are prevalent and new treatment is needed. The treatment technology disclosed and claimed in the present application is a major asset of OsteoScreen, Inc. and will be the technological foundation of a new small entity corporation, which will be dedicated to the further development and commercialization of the treatment technology. The financing and formation of the new small entity will be made impossible or be severely impaired without assurance that the application will be quickly examined.
